The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 64 is rejected under 35 U.S.C. 102(b) as being anticipated by Wadell (U.S. Patent 5,147,029).

Wadell shows in Figures 1 and 4 a series of flights 22 placed in a tube 10, a flight component 24 of magnetic material, spacers 25, magnet means 20 and 21 which generate a magnetic field and given the magnet means surround the tube the generated magnetic field will serve to center the flights in the tube.

Claim 65 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 47-63 and 66 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art does not teach placing a magnetic drive member for a flight conveyor in a bend in a tube circuit.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
